## 3. Read the following texts, identify the conclusion paragraph or sentence.

In order to prevent Chikungunya, I will follow these recommendations: First, I will empty or cover containers such as buckets, dustbins and flower pots in my yard. By doing so, I can assure that mosquitoes don't breed in my house.

Second, I will apply mosquito repellent on my arms and legs because the fragrance of the repellent will keep them away.

Third, I will sleep under a mosquito net when necessary so they don't bite me at night.

Chikungunya is preventable. It is always better to be cautious rather than getting this disease. Sometimes if it is not treated on time it may even lead to other health complications.

### The Three Rs of Rubbish

In the last 50 years people have used more resources than in the rest of history and we're destroying our planet in the process. We will have to change so that life can continue. Renewable energy will help to reduce pollution, but there are many things we can do as individuals. What exactly do we need to do?

**Reduce** - We reduce when we buy and use less! Ideally in the future we will buy durable products. At the moment, electronic devices such as TVs, computers and fridges have a short life. We throw them away and buy new ones. This creates pollution. Before buying something new, ask yourself - do you really need it? Before throwing something away, ask if there's another option.

**Reuse** - When we reuse an item many times, we reduce the amount of rubbish. When you go shopping, take bags with you to use many times. Buy rechargeable batteries and avoid buying items (like paper plates) that have only one use. When your clothes are old, take them somewhere for other people to use.

**Recycle** - Recycling extends the life of products that we no longer need. Many materials, such as plastic, paper, cardboard, metal and textiles, can be recycled and made into other things. In the future, we won't be able to put anything into landfill and we will have to reuse or recycle everything.

We live in a world where people buy and throw away easily. We need to change these bad habits and to focus on the three Rs - Reduce, Reuse and Recycle!
