

2 Choose the correct option to complete the letter

We are a group of school students from the country. This year, we have learn about different endangered species in Colombia and we are very worried about one that lives in our department: the silvery-brown manatee. It has been recorded that this small manatee reproduces just once a year and, in each group, only one female is active for reproduction at a time. For this reason, birth rate is quite low. In addition, their habitat is destroyed and we think that this will continue in the future as several roads and farms are already planned here. We can

Land vertebrates	Water vertebrates
Tapir, Spectacled bear, Dolphin, whale, seal, sloth, Blue anole lizard	Manatee

1 Classify the land vertebrates and water vertebrates. Use the words in the box.

Blue anole lizard - Dolphin - Manatee - Seal - Tapir - sloth - Spectacled bear - Tapir - whale

stop cutting trees down because the forests
provide both food and homes for the tamarin
which live in this region. Farmers can continue
destroying forests and the Department authorities
shouldn't try to plan better strategies to
help these little animals.
