Polar Bear *Ursus maritimus* The polar bear is one of eight different species of bears. It is a king of animals controlled by people. Its habitat is the ice and water near the arctic circle. These bears are animals that kill other animals. They are predators that eat other animals. Their usual food is other animals and kill them. They are also known as seals. They are an animal that other animals kill to eat. They hunt for their food during the day. This bear is the place where an animal usually lives wild and is found in the north of Canada. Polar bears are vulnerable and there are not many of them left. Their habitat is shrinking. If we don't take steps to protect them, they will become extinct. They don't exist any more, all dead.
