

Mariana Ruiz

Solution

1. R/= I think it is something related to caring for the environment.

2. R/= There are three things we must do to take care of the environment, such as Reduce, Recycle and Reuse, these are to save the world.

3. Solve the exercises

A. R/= If we want to save world we need to know the three Rs, because are very important to find a solution to different residues that we produce, that finally are trash but we can use to make new things and save world, like I said before the three Rs are Reduce, Reuse and Recycle.

4. R/= We must save the environment and know what to do about our waste, if we can reduce, recycle and reuse the environment will thank us, otherwise we must be prepared for the worst because little by little it is deteriorating and we have to know that the resources are finite.

Glass has been used for thousands of years and is relatively easy to recycle. Aluminium can be repeatedly recycled quickly and easily. Paper is recyclable but it cannot be recycled forever.

The small fibres in paper eventually become very weak so that they can't be recycled into good paper anymore. Also, not every type of paper is recyclable as some high-quality paper is too expensive to recycle.

3. Solve the exercises

A. Read the text quickly. What are the three Rs of the environment?

B. Read the text again. Are the statements True, False or Not Given?

afirmaciones son verdaderas
falsas o no se dan

STATEMENTS	True, False or Not Given?
1. The author suggests borrowing certain items rather than buying them	True
2. According to the author, shoe boxes can be very useful to store things.	True
3. Used clothes can be donated	True
4. It's not possible to recycle aluminum over and over again.	False
5. Empty plastic bottles are relatively easy to recycle.	Not Given

C. Complete the sentences with information from the text.

1. Landfills are almost to full capacity.

2. If possible, try to buy items with little or no PACKAGING
3. Bring your own bag but make sure it is heavy and more durable.
4. It's a waste of paper if you print your emails.
5. Many cities have collection points where people can take used garments that are then redistributed to people in need.
6. There is a limit to how many times paper can be recycled because it is made of small fibres.

4. Write a short paragraph to invite people to save the environment, use the knowledge you have to do it. Be creative
