

$$x + 200 = 1000 \rightarrow \text{ecuación}$$

Solución

ecuación primer
grado

a. $7x - 15 = 20$

$$7x = 20 + 15$$

$$7x = 35$$

b. $5x - 8 = 12$

$$5x = 12 + 8$$

$$5x = 20$$

c. $4x - 10 = 26$

$$4x = 26 + 10$$

$$4x = 36$$

$$d. -6x - 18 = 10$$

$$-6x = 10 + 18$$

$$-6x = -8$$

$$3 \quad a) \quad 3x - 30 = 6$$

$$3x = 6 + 30$$

$$3x = 36$$

b)

240

$$240x = 2$$

$$x = \frac{2}{240}$$

$$x = \frac{1}{120}$$
