elephant, spotted deer,
tiger, rhinoceros.

Land vertebrates	Water vertebrates
Rhinoceros, Seal, 3 birds, spotted deer, blue whale.	Whale, Dolphin, Sea turtle, manatee.

2. Choose the correct option to complete the letter.

Mr. Luis Pérez Gutiérrez,
Governor of Antioquia,
Medellín

Dear Mr. Pérez,

We are a group of school students from the country. This year, we have learned / learn about different endangered species in Colombia and we are very worried about one that lives in our Department: the silvery-brown tamarin. It recorded / has been recorded that this small monkey reproduces just once a year and, in each group, only one female is active for reproduction at a time. For this reason, birth rate is quite low. In addition, their habitat is destroyed / has been destroyed and we think that this will continue in the future as several roads and farms are already planned here. We can / must stop cutting trees down because the forests provide both food and homes for the tamarin which live in this region. Farmers can't / can continue destroying forests and the Department authorities shouldn't / should try to plan better strategies to help these little animals.

Mr. Pérez you mustn't / should ignore our petition if you wish to continue enjoying the great biodiversity of our Department.

Yours sincerely,

Group of Environmental Studies
University of Antioquia
